This is positive. DTSC is in the midst (in between the Exide Titanic) of doing a soup to nuts enhancement of their permitting program, in part due to oversight by state legislature, spurred in turn by a scathing report from a watchdog group. And Exide was one of those permit challenges.

Subject: DTSC query: EJ Practices in Permitting

Called me, works out of Barbara Lee's office (the new ED), found my name on the EPA EJ in Permitting website. I owe her info on what we know as far as best EJ public involvement practices, but after that we've agreed to go more into the other aspects of the permitting process, from pre-app to post-construction. Any tips on best p.i. practices welcome. RG

Hi Richard,

Thank-you once again for taking the time to talk with me today regarding your program. You should now have my email address and my phone number is below. I appreciate any assistance you can provide.

Sincerely,

Yvonne
